To Whom It May Concern.

We as a company and myself personally, have know Beasley Hydraulic for the past ten years. During this time Beasleys have been involved in the training of young tradesmen (apprentices) to meet their growing business needs.

I am a director on the board of AIEMNET and with Beasleys being a member and at one time Peter Beasley being a director, we have been involved in the establishment of the AIEMNET TALENT program. I am the chairman and Peter Beasley is the secretary of the Talent program in Bundaberg..

Established in 2007, Bundaberg's Australian Industry Engineering and Manufacturing Network (AIEMnet) Talent Program, has greatly assisted numerous Year 11 & 12 school based trainees to successfully kick start their career in either Engineering or Manufacturing and gain a head start over other school leavers.

The AIEMnet Talent Program is designed to connect our youth during their senior schooling to possible careers in local engineering and manufacturing. It is hoped that the successful applicants of the Talent Program will become tomorrow's apprentices and our future leaders of the industry.

During Year 11 & 12, successful applicants of the Talent Program will undertake work placement and training towards a certificate II in Engineering while continuing in schooling to achieve their Queensland Certificate of Education in Year 12.

Beasley Hydraulic has supported this program since the beginning and Peter Beasley has been a great supporter and often going far beyond what is normally required to help the students and the program.

Should you require any more information on any of the above I would only be too happy to help where I can.

Regards
Graeme Dahl
Manager/Director
