Dear Sir/Madam

Re: Letter of Support –Beasley Hydraulic Services

MRAEL and Beasley Hydraulic Services continually work closely together to ensure the success of the Australian Industry Engineering and Manufacturing Network Cooperative Limited (AIEMnet) Talent Program.

This program has been designed to connect youth during their senior schooling to possible careers within sectors of the Engineering and Manufacturing Industry. It is hoped that the participants of the 'Talent' program become tomorrow's apprentices and our future industry leaders.

Every rotation period Beasley Hydraulic Services host multiple School Based Engineering Trainees to provide them with extensive training in their field of work. Peter Beasley is heavily involved in the School and Candidate Interviews during the recruitment process of this program and is renown to be one of the leaders of the AIEMnet Talent program.

With a motivation to keep the program strong, Peter and his team are constantly hosting meetings as well as running their business to ensure the success of the program. After all, Beasley Hydraulic Services understand the importance of securing a strong future workforce for the Engineering Industry.

If you have any questions please do not hesitate to contact me on either 0429 101 112 or dditfort@mrael.com.au

Yours faithfully

Dana Ditfort
Apprentice Services Manager
